## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 3,4,7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. None of the references of record teaches or suggest the claimed features including forming a plurality of channels in the bottom of the shroud in an optical connector and a slope formed by shaving the bottom of the cylinder.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Gilliland et. al., U.S.P. No. 5,815,623.

Gilliland et. al. 623' teaches (Figs.1-10A) an optical fiber connector comprising : an optical fiber plug 406,404,80 that is plugged/unplugged to a cylindrical shroud section 50 (Note the cylindrical section can have first and second sections), a cylinder axially extended a predetermined distance from a center of the bottom of the cylindrical section so that a fiber plug can be fitted and coupled coaxially to a light laser or detector 75,70 placed on an integrally formed flange 20 where the shroud section can be

integrally molded 706 with longitudinal slits 702 to facilitate an optical plug which clearly, fully meets Applicant's claimed limitations.

The following references are also cited by the Examiner as being pertinent prior art: Yamabayashi et al., U.S. patent Application Publication No. U.S. 2002/0168153A1 (Figs.1-5B), Gilliland et. al., U.S.P. No. 6,550,983 (Figs.1-12) and Gilliland et. al., U.S.P. No. 6,283,644 (Figs.1-25).
